Grains OF HOPE

“*Now he who supplies seed to the sower and bread for food will also supply and increase your store of seed and will enlarge the harvest of your righteousness. You will be enriched in every way so that you can be generous on every occasion, and through us your generosity will result in thanksgiving to God.*

- I Corinthians 9: 10, 11

Drought, flooding, earthquakes, hurricanes... when a disaster strikes people have little choice but to grab what they can and flee.

Your gifts are working hard to help families practice conservation agriculture by using climate-adaptive and soil-preserving strategies.

Grace is a mother and wife. Her husband is weak and cannot work in the fields—the farm is her responsibility. For decades Grace struggled to coax the maize and cassava she grows to provide an income for her family. She heard about new methods, but was skeptical.

Shy and uncertain, Grace attended a seminar run by a World Renew partner. With nothing to lose, she tried the new methods on her maize crop and was amazed by the transformation! The harvest was so much greater.

Today, Grace is convinced: conservation agriculture has helped her open three new plots of land, purchase a goat (now she has 5) and she's looking forward to building a new home!

Providing emergency food is a great start, but equipping farmers with new techniques to increase their crop yields creates long-term change for families, even entire communities.

*Your gift of \$60 provides for a family for 1 month
—every gift is eligible to be matched up to 4X.*
