

Gifts of Animal Raising

Goat: A goat provides a family in need with nutritious milk, meat, and even fertilizer to grow more crops. A goat helps a family grow more food to eat and to sell for income to buy clothes or medicine.

Chicken: Raising chickens is a wonderful way for a family to start a low-cost home business. Families that are struggling to eat each day can invest in raising chickens for food with your gift from World Renew.

Rooster: Chickens provide farm families with eggs for protein as part of a nutritious diet, but your gift of a rooster that fertilizes the eggs will hatch baby chicks to grow a flock. That's a gift to crow about!

Friendship Pack: A friendship pack of four chickens and a goat helps farm families earn money by selling eggs and milk. Your gift helps parents earn enough income at home, so they don't need to travel to find work.

Chicken Coop: Your gift of a 2-by-5-foot chicken coop helps a farmer keep their poultry clean and dry. A coop helps control bacteria and parasites as well as prevents respiratory illnesses to keep chickens healthy.

Duck: Your gift of a duck provides a farm family with protein for better health, and the droppings are fertilizer to grow more nutritious vegetables. Raising ducks helps families earn income all year.

Goats and Quackers: Your gift is five ducks and two goats that provide meat, eggs, milk, and income for the families that raise them. You are helping village families earn a steady income to sustain them when food is scarce.

Rabbit: Rabbits are a great gift because they reproduce quickly to help subsistence farmers earn money. Your gift of rabbits helps a farmer get a quick start in raising them for food, fertilizer, and income.

Pig: World Renew helps people in the most need in a community with the gift of a pig and training in raising healthy livestock. Your gift of a pig provides a family living in poverty with fast growing income!

Piglet: Your gift of a piglet helps a person with few job opportunities earn much needed income. Piglets can be fattened and sold for a profit quickly. In 6 months, they can grow to 250 pounds.

Thank You!
