

CAPABILITY STATEMENT

INTERNATIONAL DISASTER RESPONSE

INTERNATIONAL DISASTER RESPONSE SNAPSHOT

\$17.15 MILLION USD in assistance was provided in FY23 to **194,378** participants in **22 COUNTRIES** through **40** projects.

\$123.73 MILLION USD assistance in the last 10 years has supported **585** projects in **52 COUNTRIES**

Who is World Renew?

World Renew is a faith-based international development and humanitarian organization, working since 1962 to address the root causes and impacts of poverty, disaster, and injustice. With a USD \$45.6 million budget in 2023, we work with 67 local partners and have a long-term presence in 19 countries throughout Africa, Asia, and the Americas, bringing permanent, sustainable change to vulnerable communities and working towards the Sustainable Development Goals. In emergencies, natural disasters and humanitarian crises, we provide consultation, technical assistance, and financial support to strengthen the capacity of our partners as they implement programs that integrate agriculture and food security, health, economic opportunities, peacebuilding and justice, disaster response and preparedness, and gender equality. As an industry leader in prioritizing local ownership of programs, World Renew uses Participatory Learning and Action (PLA) methodologies so communities can identify challenges, evaluate their assets, and generate their own solutions.

Our Disaster Response Work

World Renew has been assisting survivors of conflict and natural disasters since 1962. In the last ten years, World Renew has managed and supported 585 separate humanitarian projects totaling In \$123.73 Million USD and reaching 3.2 million people in 52 countries. In 2023, over half of this humanitarian funding went to preventing food insecurity, the majority of which used modalities of in-kind food, cash, and voucher assistance. The remaining was directed to emergency response & disaster recovery, humanitarian, development and peace nexus work, agriculture, livelihoods, nutrition and Water, Sanitation and Hygiene (WASH) programming. Response priorities include gender-sensitive assistance to conflict-affected families in regions like Ukraine, Nigeria, Syria, Lebanon, Gaza, and South Sudan, and to those affected by drought and floods in Madagascar, Kenya, Haiti, and Malawi. Given the shifting global context with conflicts, instability and people fleeing disaster and insecurity, this work focuses on reaching the most vulnerable, helping to meet immediate basic needs, support psychosocial recovery from trauma, and provide longer-term support in protracted crises.

Key Programming Approaches

- **Gender Focus:** Women's priorities are at the center of our efforts, ensuring access and control of resources, increased decisionmaking, and empowering women and girls.
- **Partnership:** Ninety percent of our humanitarian programming is implemented by local partner organizations, enabling our responses to: be tailored to, and informed by, community needs; reach communities that were otherwise inaccessible due to limited organizational capacity or insecurity

preventing access; contribute to localization by strengthening local actors; and conduct humanitarian-development nexus programs.

- **Food Security:** Emergency food assistance, including in-kind food, cash, or vouchers, is the largest component of World Renew's humanitarian programming. Our extensive global procurement capacity ensures in-kind food is sourced as locally as possible. Cash or voucher assistance is informed by market assessments which determine the strength of markets and the willingness of local communities to use these modalities. Currently, more than half of our emergency food responses use cash or vouchers.
- **Nexus programs:** World Renew bridges immediate and long-term responses, moving from emergency aid to resilience and economic recovery by strengthening livelihoods, providing training and capital for small business formation, setting up village savings and loan groups, breaking down gender barriers, and improving local disaster preparedness.

Our Expertise in Disaster Response

World Renew is a founding member of the Canadian Foodgrains Bank (2023 revenue: CDN\$82 million) and one of the largest programming members. With access to funds through this membership, World Renew has significant organizational capacity in emergency food assistance, long-term food security, and agricultural programming. World Renew's partnership model ensures that humanitarian assistance is gender sensitive and reaches vulnerable populations in conflict and difficult-to-access settings. Through membership in the ACT and Integral Alliances, World Renew has responded to humanitarian emergencies in over 120 countries. World Renew is a member of Cooperation Canada, the Humanitarian Response Network (Canada), and the Canadian Christian Relief & Development Association. World Renew has received humanitarian funding from donors such as Global Affairs Canada (GAC), UK Aid, USAID's Bureau for Humanitarian Assistance, and non-government organizational and private donors in North America and Europe. World Renew has extensive field experience in cluster coordination within the UN system, particularly with food security, WASH, and shelter.

Evidence of Impact

In response to the war in Ukraine since 2022 and the humanitarian crises that has resulted, World Renew has worked through local partners in a variety of sectoral responses, including emergency assistance, cash transfers, shelter support, psychosocial care, and economic recovery. From 2022-2024, this has included a combination of \$3.21 Million USD across 12 projects, in partnership with local partners and members within ACT Alliance, Integral Alliance and within the CFGB Network. This includes ZOA, Integra, ADRA and Medical Teams International and International Health Partners. Resulting from this, World Renew has supported over 26,000 participants, this includes Multipurpose Cash transfer to 14,425 conflict affected individuals and over 916 houses repaired and/or provided with modular homes.

Best Practices and Innovations

- **Partnership:** World Renew's unique approach to humanitarian programming relies on long-term partnerships with locally-based organizations. A rich history of partnerships in countries around the world has equipped World Renew to respond with agility in disaster settings and continue programming long after others have left. This approach supports the capacity building of local partners in Sphere and the Core Humanitarian Standards.
- **Early intervention:** Using data from standardized food security indicators and Early Warning and Surveillance Mechanisms, World Renew supports food insecure households before hunger reaches crisis levels. By responding in contexts where severe food-security repercussions are expected without intervention (Integrated Phase Classification System IPC 2), World Renew strives to ensure that households do not cross into more serious levels of food insecurity (IPC 3 or higher).
- **Multi-sectoral integration:** World Renew has significant experience in WASH, food, non-food items, shelter, economic recovery, infrastructure, and psychosocial support programs. This expertise allows for integration of sectors enabling responses to more sustainably and holistically meet the needs of affected communities.
