

World Renew is grateful to partner with you through the Peter Fish Campaign! Here are some instructions on how to assemble your recycled cardboard Peter Fish Coin Banks.

Peel off the paper attached to the adhesive section of the Peter Fish Cardboard Bank.

Fold the cardboard into a funnel shape and use the adhesive to bring it together.

Fold the bottom section (the one without the coin slots) in by inserting the two tabs into their corresponding slots for each component.

Move to the top section and pop out the coin slot pieces, and then fold the components in the same way as the bottom section.

Your Peter Fish Cardboard Bank is now assembled. The tabs at the top and bottom can either remain attached or be trimmed off according to your preference.

Decorate your Peter Fish Bank with the stickers provided and feel free to colour your coin bank, as well.

Once your Peter Fish Cardboard Bank has been completed, use the World Renew Activity Booklet to follow along and find ways you can help support families living in poverty around the world. Check with your church on when to return your Coin Bank. Thank you for joining World Renew to help plant hope and end hunger!
